Microneedling

Microneedling is a minimally invasive cosmetic treatment designed to enhance the skinâ??s appearance by stimulating collagen and elastin production. Tiny needles create micro-injuries on the skinâ??s surface, activating its natural healing process. This versatile procedure offers several benefits, including:

default watermark

â?¢ **Skin Rejuvenation**: Reduces wrinkles, fine lines, discoloration, and uneven skin tone.

â?¢ **Scar Reduction**: Helps diminish the appearance of acne scars, surgical scars, and stretch marks.

â?¢ **Hair Restoration**: Supports hair regrowth in conditions like alopecia.

â?¢ **Improved Skin Thickness**: Strengthens the thinning epidermis, which naturally occurs with aging.

â?¢ **Minimized Pore Size**: Reduces the appearance of enlarged pores.

Microneedling is safe, cost-effective, and requires minimal downtime. Studies suggest 4-6 treatments over the course of 4-6 months with results lasting 3-4 years.

Rose + Remedyâ??s microneedling clinic is located in Oakland, California. Book your in-person appointment today.
